

# The Local Food Economy

Good money increases when products are exported and when outsiders visit and spend.

- 1) **Good Money** – Increase the amount of money coming into the community
- 2) **Neutral Money** – Increase the velocity of money circulated in the region among local businesses
- 3) **Bad Money** – Reduce income leaving the community via outside purchases

**Local Food Economy**

Bad money is reduced when locals spend more at home.

Neutral money speeds up with business to business trade
